Association Meetings

What are your thoughts on how we currently utilize our association meetings? Would you like us to spend more or less time on these things?

Open Comments

- Traffic calming, and overall improvements to infrastructure such as curbs, sidewalks and lighting, would make the neighborhood feel much safer from a pedestrian and recreational standpoint.
- Is there \$ or other support for removal of fallen branches? Stuff that is too small for the city to respond to, but too large for a resident to clear on their own?
- The alley project should continue!

Open Comments Continued...

- We need more police presence in our neighborhood. We pay the highest taxes in Allen County. We need the speeding to be brought under control.
- I'd like to see us develop some policies to force landlords to take better care of their properties.
- I'd like to see more partnership with city resource providers to fix the low tree canopies, trash and weeds, traffic speeding, and neglected alley ways.

Open Comments Continued...

- I'd like to see more sidewalk repairs, even if the homeowner doesn't request it.
- GFL does a horrible job of emptying refuse leaving glass and debris in their wake. The city does nothing to help with this.
- Rental properties often leave mattresses/broken furniture to sit for months without any consequences from the city.
- The board works hard and does amazing work. Thank you. Best neighborhood association in town.

Thank you!
